COTTON MARKETS

Market Steady and Most Time Shows Advance-Weather Being Closely Watched.

Monday Afternoon, May 5 Steadiness ruled in the cotton mar ket today, although disappointing ca

ket today, although disappoluting cables and a fairly good weather map over the week-and encouraged some enamens in the early part of the trading session. Just what prompted Liverpool to come worse than expected was left to guesswork, but it was thought probably due to the character of weather and crop accounts being received from this side. The developments at Paris were regarded as favorable, for the opinion seemed to prevail that Italy would soon be back at the table and that adjustment of differences would be had.

The weather map showed that some rains fell in certain sections over the week-end, but the feature which encouraged a little buying was that in disations were for some rain, thus arousing the bugbear of a "wet Maytalk. This proved a fairly good talking point, especially as there was also marked strength in the grain market, which probably stimulated some firmness in cotton, as the two markets have for some time been so closely associated. However, there was promise of cooler weather to come into the best, though not to the extent that harm is likely to be done, which tended to neutralize fear of rain. The fact that the two domestic speculative markets will be closed tomorrow, due to celebration in New York of the return of the 77th division of soldiers, also was a factor inducing some covering, lone some surprise come.

More acreage reports are coming, one today from the National Ginners' asso-

some surprise come.

More acreage reports are coming one today from the National Ginners' association showing a reduction of 14.6 per ceat, thus tending to offset some of the more bearish ones. Sentiment is tending toward an expectation of a reduction of somewhere between 30 and 15 per cent, so the effect of figures around there are not expected to have much influence.

Liverpool was due to come 17 points to the bad, but closed quiet but steady at a net loss of 21 to 26. There was better business in the actual, sales totaling 7.000 bales, including 5.700 American. Receipts were nothing. There

taling 7.000 bales, including 5,700 American. Receipts were nothing. There was little news from the foreign center. At the opening domestic markets were quiet and at slight declines, and news was scarce and without color. Trading was small and professional sentiment seemed in favor of further reaction. Advices from the goods markets were favorable and there was nothing but good news from the spot department, which was accempanied by fairly good support. July opened at 25,65c, touched 36,5tc and their rose until in the afternoon it sold as high as 26,85c. October in the same time started at 24,60c, went as low as 24,58c and up to 24,9tc, realizing meeting the higher level and a moderate setback following.

From the spot department came little to was new, but demand as a rule ntinued good. Scarcity of freight m was still complained of, but a little was offering locally at an advance of 90 points over the last quotation, the new price being \$2.50 from gulf ports to Liverpool. One of the findrances to business is inability to get space for shipments. But there are promises of relief soon, which is helping to give strength to the market. NEW YORK COTTON.

NEW YORK, May 5.—The cotton market was comparatively quiet during today's early trading and finctuations were somewhat irregular. The opening was one to 11 points lower, in response to disappointing cables and New Crieans and Wall street selling, but prices steadled around 26.55 for July and 24.50 for October, on Liverpool buying and covering. Private cables reported increased continental and hedge selling in Liverpool, but said there was a good demand for spot cottom and trade calling on the decline in futures.

MAY NOW TRADE IN the front of the decline in statures.

Buying by domestic trade houses and Liverpool was a feature on the advance from the opening decline, but general business was quiet. July contracts sold up to 26.88 and October to 24.88, or about 14 to 15 points net higher late in the morning. A Southern authority estimates the reduction in acremage at 14.6 per cent.

Trading was very quiet during the early afternoon, but prices held steady within a point or two of the best, or tober delivery.

Continued Wet Weather Has Stimulating Influence on Corn Quotations.

Corn Quotations.

Citic Ago. May 5—Fresh urityns in the value of corn resulted totals from continued wet weather which made both hauing and planting difficult if not impossible. On the new advance July delivery touched the highest price yet this searon. Frofit-taking sales, however, led subsequently to something of a reaction. Opening figures, which ranged from \$4c to 12%c higher, with July \$1.69% to \$1.71 and September \$1.65 to \$1.66 were followed by moderate additional gains and by railies from the ensuing setback.

A sensational break in prices took place just before the close as a result of heavy selling and of a sudden lack of all support. The extraordinary change in the temper of the market was due to announcements from Minneapolis that the United States government had arranged to import wheat from Canada and that a downward revision of prices of foodstuffs was any title and the flurry, the extreemed fail of values was about 12 cents, but the market also reacted with great also cents to 5 cents net tower, with July \$1.65% to \$1.65% and September \$1.60 to \$1.60%.
